EXPERIENCE

Full Stack Developer

Jul 2026 – Sept 2026

Converge Solutions Pvt. Ltd.

Lalitpur, Nepal

- Building a multi-tenant KIOSK banking system with AI/ML integration, contributing to system architecture and design decisions.
- Developed a gym management application and led a redesign of the company website, improving usability and performance.

Full Stack Developer

Jan 2026 – Jun 2026

ACID Integrations

Remote

- Shipped production-ready full-stack features end-to-end in React and TypeScript, from database schema to UI.
- Refactored the frontend into modular, reusable components, cutting maintenance overhead across the codebase.
- Redesigned backend database schemas for cleaner data models, accelerating feature development for the team.
- Built and integrated an audio analysis module into the core product pipeline.
- Drove code quality through rigorous PR reviews, Git-based workflows, and Agile sprint practices.

PROJECTS

WorkForge | *Next.js 15, tRPC, Drizzle ORM, PostgreSQL, Better Auth, WebRTC*

Github

- Built a multi-tenant employee management SaaS using subdomain-based tenancy architecture.
- Designed a 4-role RBAC system (CEO, HR, Manager, Employee) with strict tenant isolation, IDOR prevention, and privilege-escalation protection.
- Added video calls with AI-generated meeting notes and an applicant tracking workflow.
- Optimized Drizzle ORM queries through indexing and restructuring, cutting unnecessary database round-trips.

Readora | *Next.js, TypeScript, Prisma, PostgreSQL, MongoDB, tRPC, Stripe*

Github

- Built a storytelling platform for publishing and reading novels, with draft management, scheduled chapter releases, and publishing workflows.
- Designed a coin-based monetization system with Stripe integration for premium chapter access.
- Architected dual-database storage — PostgreSQL for relational data, chunked MongoDB for long-form content — enabling efficient retrieval at scale.

Hash | *Next.js, TypeScript, tRPC, Drizzle ORM, Stripe*

Github

- Built a full-stack Hashnode clone with a rich-text editor, multi-author publishing, and Stripe subscriptions, earning 100+ stars and 19 forks on GitHub.
- Implemented a type-safe t3-stack architecture for end-to-end type safety from database to UI.
